

APPENDIX PRECISION SHOOTING

CBI Precision Shooting Int'l Record Homologation

Foreword

Specific procedural aspects are covered by this document, which is an integral part of the CBI Competition Rules.

The contents were first drafted and updated by the working group before being approved by the Board of Directors, then by the ExCom.

The date of application of this procedure coincides with the date of issue of this document, unless otherwise specified.

LOC (Local Organizing Committee) is responsible for the full implementation of requirements necessary to activate this procedure in conjunction with any CBI Continental or World Championships or other CBI listed events.

Deviations or non-application of this procedure inhibit confirmation of records and/or results achieved.

Confirmation of a CBI Continental or World Record

The individual score achieved by any athlete in a competition calendarized by CBI as a world or Continental Championship must be validated through a specific procedure to be used as part of the record confirmation process.

1. At the end of the assigned time, the Result Sheet is produced and undersigned by the Referees and the Director of the Competition. Result sheet should include the photo of the carpet number and the confirmation that all equipment's comply with technical Rules.
2. The score achieved by the athletes is compared by the Director of Competition with the list of records in force on the date of the event.
3. The athlete is asked by the Director of Competition if he/she is interested in validating his score as a World or Continental Record.
4. If the Athlete decides to ask for the activation of Record Confirmation protocol, the Director of Competition will activate procedure where a qualified CBI Officer and/or a Doping Control Officer, activate the protocol where:
 - a. If the athlete has already been selected for an Antidoping test, the negative result of the sample analyzed by laboratory will automatically confirm the validity of the score reached, as required from record confirmation procedure.
 - b. If the athlete has not been selected for an Antidoping test, a urine drug free test will be carried out with the support of the CBI approved kit. The negative result of the test will automatically confirm the validity of the score reached, as required from record confirmation procedure.

CBI Precision Shooting Int'l Record Homologation

5. If any athlete faced with specific pathologies diagnosed and documented, should take, or has taken substances banned in sport (WADA list) must inform the Director of Competition and /or Event's Medical & Antidoping Manager before the start of the competition.
6. A chaperone is assigned to an athlete by the Director of Competition and/or Event's Medical and Anti-Doping Manager to adhere to the procedure and duties specified by ISTI WADA.
7. The Medical and Anti-Doping Manager manages the collection of urine samples in line with ISTI WADA requirements but using CBI-approved forms and materials.
8. The event's Medical and Anti-Doping Manager evaluate the results. In the event that the control output is considered questionable, the Medical and Anti-Doping Manager will take action by carrying out 2 more checks on the same urine sample before expressing his evaluation. " Despite hindering confirmation of the record, adverse outcomes cannot be used as evidence for a potential civil or criminal sanction as they occur outside of the legal sphere ".
9. To confirm records, all athlete kit outputs should be photographed in front of the Director of Competition and returned overnight to the CBI Medical and Antidoping Manager.
10. In the absence of a written objection the record will be confirmed and included in the official CBI Record List. Instead, the result cannot be homologated if the athlete opposes the referee or procedural structure's judgment.
11. Upon a full review of the compliance of the administrative process, the record will confirmed & published on the CBI website.

--- end of document

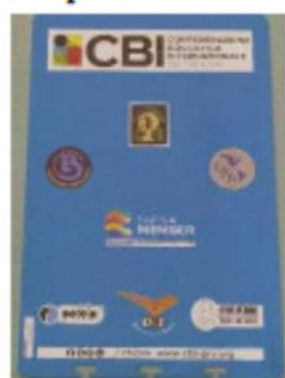

CBI Precision Shooting Int'l Record Homologation

After the event, the following documents must be sent to the CBI Technical Commission within 7 days.

1. The result sheet with the relevant signatures and the photo of the carpet in use, where the numbering is clearly visible.

Carpet number

2. The commitment to clean sport and ethics / Record confirmation.
3. The record homologation request form for the precision shooting.

If the inspection by the Technical Commission is negative, the applicant will be informed immediately.

As result of our membership in the WPBF (World Pétanque Boules Federation) International Federation adhering to the WADA system and by CBI Statute:

All events scheduled by CBI are conducted in compliance with the World Anti-Doping Code which provides a list of prohibited substances, specific procedures for therapeutic purposes and the self-defined limit of alcohol content for athletes.

Confirmation of Continental and World Records is dependent on the negative outcome of tests conducted by qualified personnel in the CBI system.

TD

Please send a photo of the carpet where we can see the number and a doping control sheet in case of a new world record.

This procedure sets the process of collecting urinary samples in an international event scheduled by CBI

The hesitation of the procedure and the related decisions are exclusively under the responsibility of the Technical Commission in conjunction with the Medical Commission & Antidoping

Operational Steps:

1. Before the event: The Event Organizing Committee (LOC) shall assign 60 days before the start of the event a trusted official who will act as an operational interlocutor with delegated responsibilities, to fix all preliminary activities by interfacing directly with both the Technical Commission and the Medical & Antidoping Commission.

at this stage these activities are normally managed:

- Identification and equipment of the medical room and/or control room
- Organization of the interface /integration with the local emergency medical service
- Acquisition of ancillary equipment for sampling
- Formation of the Sample Collector Personnel (Male & Female)
- Training of Notifying & Escorting Chaperone (Male & Female)
- Reporting

2. During the event: All activity coded and/or contracted with the LOC must be operational from 1 hour before the start of each daily competition until the end of the control session, even if it ends after the award ceremony

3. Selection of Athletes; The athletes selected for control, will be identified by the International Technical Commission that will communicate the names to the Competition Director, close to the end of the event. The Director of Competition will pass the information (Mission Order) directly to the Responsible of the Controls that will activate the duties

4 Support of Athletes; This activity takes place with the same criteria and methods of WADA urinary controls

5. Carrying out the check; Urinary control is carried out exclusively by qualified personnel (Sample Collector) inspired by WADA standards, using standardized kits provided by CBI and in total respect of privacy.

6. Hesitation: The results will be evaluated by the Medical & Anti-doping Commission, remotely after receipt of the forms within 2 hours after the conclusion of the same

Foreword

This document has been developed by CBI to assist Local Organizing Committees, National Federations, and Athletes in facilitating the organization management or participation in an CBI Calendarized event.

Contents provides references for medical care, emergencies, clean sport and other related information that allow all athletes and involved staff to compete and act in a safe environment during their stay.

By-laws or By-statute, mandatory requirements, are appropriately highlighted in the text.

☒ *Specific questions can be required by email at: **compliance@cbi-prv.org***

☒ *An emergency phone number will be available at Event Checkin*

----- issues

1. CBI regulations require that the LOC organize and provide medical and emergency services for all athletes, teams, and staff involved in the event and practice sites for the entire competition period (from opening until Podio).

2. It is the responsibility of Teams & involved staff to organize extension of their own health care coverage for the specific event in accordance with applicable national/local, relevant laws.

3. Before the event kicks off, the Event Manager & CBI Medical Delegate, must jointly confirm that the required medical staff and equipment are in place before starting any daily training or competition.

4. Competition Medical Service, For the duration of the event, starting from 30 minutes before the start of the scheduled activity (Training and/or Competition) until the end of activities the medical emergency service must be operational on site.

IN PROGRESS

In principle, the medical service is composed of qualified personnel authorized to operate on the territory of the venue according to local laws

The medical team will be positioned near the track field, will have private access and management of a specific and equipped room, and will have validated agreement to manage the transport of critical patients at identified and pre-alternate facilities

In principle, recurrent pathologies during competition can be identified in the following areas: traumatology of the dominant shoulder, spine, cervical, lumbar, and lumbosacral, and hip and knee.

5. Medical Service on Site, starting from the day before the opening data until the day after the end of the event will be activated on the territory a series of contacts and operational references to be able to cope with medical needs, including non-emergency ones.

A memo with all contacts will be available both at the reception of the accommodation sites involved and at the race site.

All medical personnel must have a valid license to practice in the host country and carry the standard insurance for their scope of practice.

6. Travel Info, It is strongly recommended both athletes and escorts to check on the official sites of the nation where the sporting event will be held any restrictions on the import of drugs (type and quantity) where necessary, to avoid seizure of the same and any associated sanctions.

This recommendation is particularly important for those who work as a team leader and for all members of both teams and support groups

7. Food and Intolerance, It is the responsibilities of the hosting LOC to manage food and drinks availability at compensation of most common intolerances with the agreed menu plan.

8. Drinks & Supplements, it is responsibility of each single athlete to meet the WADA List in force at the moment of the event and deviation, if any, covered by a TUE.

CONFEDERAZIONE
BOCCISTICA
INTERNAZIONALE
PUNTO - RAFFA - VOLG

IN PROGRESS

9. Medical Station, the medical room should be well-signposted, easily identified, and located close to the competition lanes.

The medical room equipment must be consistent to support the first treatments while awaiting medical assistance and/or transfer to a hospital.

10. Clean Sport Controls & Record Conformation, by statute CBI pursues the objectives of ethical and drug free sport, an objective that is monitored during events through urinary controls managed by qualified CBI officers.

The Protocol is also used to confirm Continental and World Records where any infringement will stop the recognition of the result.

11. Antidoping Controls, Regarding the anti-doping controls CBI implements both independently and as a sport discipline of the WPBF of doping controls in accordance with WADA standards.

The prohibited list is available at <https://www.wada-ama.org/en/prohibited-list>

Any infringement will stop the recognition of the result and the athlete will be referred both to the sports justice.

Extra Note

ForeWord

CBI has produced this document to aid Local Organizing Committees, National Federations, and Athletes in managing or participating in an International CBI event.

The content provides references for confirmation of a World or Continental Record, as well as a guide to comply with statutory requirements to secure a clean event (Drugs & Doping) and child safe, where applicable.

By-laws or By-statute are mandatory requirements that are appropriately highlighted in the text and referenced as compulsory and sanctionable requirements.

Specific questions can be required by email at: compliance@cbi-prv.org

----- issues:

1. The Event Organizing Committee (LOC) shall assign 60 days before the start of the event a trusted official who will act as operational interlocutor with delegated responsibilities, Inclusive of the preliminary ones required to fix activities by interfacing directly with both the CBI Technical Commission and CBI Medical & Antidoping Commission.

In case of LOC default will be the CBI Technical Commission that will appoint the responsible charging the costs to the profit and loss account of the event.

As minimum these activities cover:

- a. Organization of the interface / integration with territorial emergency medical services and Medical Emergency Plan;
- b. Organization and management of the on site event medical services
- c. Organization and management of the medical room and/or control room on the event site according to WADA standards
- d. Organization and education of Chaperones and Volunteers (Male & Females)
- e. Obtaining sufficient equipment for sampling (Record Confirmation / Clean Sport)

**CBI**

IN PROGRESS

2. Selection of Athletes; Athletes required for controls, are identified by:

- a. CBI Medical & Antidoping Commission in cooperation with Event Director.
- b. Control for record confirmation are automatically included into the list.
- c. Controls for Int'l Antidoping (WPBF) are identified and managed directly by WADA system

3. Notification to Athletes; Gli atleti selezionati per il controllo, saranno informati direttamente dagli Chaperone che provvederanno ad attuare, indipendentemente dal tipo di controllo, la notifica e l'affiancamento sino al raggiungimento della Doping Control Station in accordo con i requisiti dello standard ISTI della WADA.

4. Collection and hesitation of urine samples shall be carried out as follows, except for WADA controls according which will be bound by the application of ISTI standards and all applicable WADA specifications.

- a. The CBI Sample Collector will collect the urine using materials provided by CBI. Collected urine sample must be sufficient to obtain a reliable multiple measurement (approximately 2 cm)
- b. The CBI Sample Collector is responsible for identifying all the sampling materials with athlete's name.
- c. The CBI Sample Collector, using the multi-drug kits provided by CBI manage the process for the hesitation of the urine sample
- d. The CBI Sample Collector responsible for the control may decide in case of doubts or suspected false positive, to double repeat the urinary control (same and/or additional) using other kits.
- e. If a single or multiple hesitation confirms the negativity or positivity to a substance, this information will be reported and signed by the CBI Sample Collector before the info transfer in strict confidence to the Event Director for the implementation of the sanctions.

5. Form, Registrations & Reporting. following form when completed should complete the filing system:

- a. List of Athlete and ID / Ranks to be tested
- b. Athlete Urine test Report (Single or Repeated) signed by the CBI Sample Collector
- c. Images of all Sample Outputs with unique references
- d. Copy of TUE / Prescriptions of tested athletes
- e. Final report

Note: The format for unique references should be 240311-AX/1, which includes the event date and a sequential identification set of two letters assigned on the athletes list and the hesitation test (where /1 is the first scoring - /2 is the second scoring on the same sample - etc)
